SUBJECT: Contractor Maintenance Proposal
Project Dragon Lady - FY-61
Westinghouse Reference AAN-31363

Enclosure: 1. Three (3) copies of Price Analysis, dated June 15, 1960.

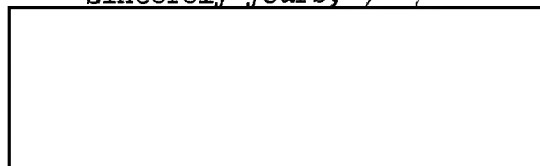

Dear Jim:

For the continuation of field maintenance in FY-61 on Project Dragon Lady, we submit a fixed price quotation of \$91,093 (see Encl. 1). This estimate is based on the same terms and conditions set forth in contract HF-8142 except for the period of performance. Further this quotation considers only domestic services; if foreign services is required we would be glad to negotiate an appropriate contract change. It is to be noted that included in this estimate is \$4,000 for major transportation and emergency spares to be recovered at cost.

In negotiating the redetermined price on contract HF-8142 we indicated that any further contracts must include profit at the rate of  of the estimated cost. This quotation is submitted with profit figured on this basis and it is our understanding that the profit to be negotiated in the redetermination of FY-61 contract will be based on  of the total cost.

STATINTL

Sincerely yours, 

Interceptor FCS Proj.
